

Meta App Review — Mako submission kit

Paste-ready copy and screencast scripts for Facebook / Instagram / WhatsApp / Ads Advanced Access.

Official docs:

- [App Review introduction](#)
- [Screen recordings](#)
- [Permissions reference](#)

Finish Business Verification before submitting App Review.

1. App verification details (paste into submission)

App name: Mako (Tekrem Innovation Solutions)
 App URL: <https://mako.tekreminnovations.com>
 Privacy Policy: <https://mako.tekreminnovations.com/privacy>
 Terms of Service: <https://mako.tekreminnovations.com/terms>
 Data Deletion Instructions: <https://mako.tekreminnovations.com/data-deletion>

TEST ACCOUNT (Mako login – email/password, not Facebook Login):

Email: [REVIEWER_EMAIL]

Password: [REVIEWER_PASSWORD]

Pre-setup for reviewers:

1. Workspace already exists with Brand Brain filled.
2. Facebook Page “[PAGE_NAME]” and linked Instagram Professional account are ready.
3. No 2FA on the Mako test account.
4. English UI.

How to access the Meta features:

1. Open <https://mako.tekreminnovations.com> and Sign in with the credentials above.
2. Open sidebar → Connections (/publisher) to connect Facebook / Instagram / WhatsApp.
3. Open Content Engine (/content) to create and publish posts.
4. Open Social Inbox (/replies) to pull comments and reply to DMs.
5. Open Ads (/ads) for Meta ad campaigns.
6. Open WhatsApp (/whatsapp) for WhatsApp Business messaging.

Please follow the attached screencasts exactly. Each video is labeled with the

Replace bracketed placeholders before submit.

2. Permissions Mako requests

From `api/src/modules/social_accounts/social_accounts-oauth.scopes.ts` :

Product	Permissions
Facebook Pages	<code>pages_show_list</code> , <code>pages_manage_posts</code> , <code>pages_read_engagement</code> , <code>pages_manage_engagement</code>
Ads	<code>ads_read</code> , <code>ads_management</code> , <code>business_management</code>
Instagram	<code>pages_show_list</code> , <code>pages_read_engagement</code> , <code>instagram_basic</code> , <code>instagram_content_publish</code> , <code>instagram_manage_comments</code> , <code>instagram_manage_messages</code>
WhatsApp	<code>business_management</code> , <code>whatsapp_business_management</code> , <code>whatsapp_business_messaging</code>

Only submit permissions you can demo end-to-end in a screencast.

Prerequisite: at least one successful Graph API call per permission within ~30 days before requesting Advanced Access.

3. Per-permission use cases (paste into each permission)

`pages_show_list`

Mako is a social publishing platform. After a Page admin connects Facebook in

`pages_manage_posts`

Mako lets Page admins create posts in Content Engine and publish or schedule t

`pages_read_engagement`

After a post is published, Mako's Social Inbox pulls comments and engagement f

`pages_manage_engagement`

From Social Inbox, Page admins reply to Facebook Page comments without leaving

instagram_basic

Mako connects Instagram Professional accounts that are linked to a Facebook Page.

instagram_content_publish

Mako lets users create image/video posts in Content Engine and publish them to Instagram.

instagram_manage_comments

Mako's Social Inbox shows Instagram comments on published posts and lets the user respond to them.

instagram_manage_messages

Mako's Social Inbox (All inbox) shows Instagram Direct conversations for the connected account.

ads_read

Mako's Ads product lets marketers view Meta (Facebook/Instagram) ad campaign performance.

ads_management

Mako's Ads product lets marketers create and publish Meta ad campaigns (Facebook/Instagram).

business_management

Mako needs business_management so users can select the correct Meta Business account.

whatsapp_business_management

Mako's WhatsApp hub lets businesses connect their WhatsApp Business Account and manage messages.

whatsapp_business_messaging

After WhatsApp is connected, Mako sends and receives customer messages (including

Facebook Login (email / public_profile) — if requested

Optional: users may sign in to Mako with Facebook. We use public_profile and email

4. Screencast scripts (shot-by-shot)

Recording prep

- Log out of Mako and Facebook (clean browser profile recommended).
- English UI, large cursor, 1080p+, record browser window only.
- No microphone audio (reviewers ignore it).
- Annotate each permission at the moment it is used.
- Always end with proof on Meta (Page / Instagram / Ads Manager / phone), not only a Mako toast.
- Have a Facebook Page + linked Instagram Professional ready; pre-stage a test comment/DM where needed.

Video 01 — Login + Connect Facebook

Permissions: pages_show_list (+ consent for Page scopes)

Time	Action	On-screen note
0:00	Start on Mako login (/auth), logged out	Start: logged out of Mako
