

Mako user guides

Plain-language help for people who create and publish content in Mako.

These guides are for marketers, content creators, and team leads — not for developers.

Guides

Guide	Who it's for
Getting started	First-time users setting up their account and brand
How to manage content	Creating, scheduling, and publishing social posts
Team roles & approvals	Inviting people and reviewing content before it goes live
After you publish	Inbox, analytics, and day-to-day follow-up

What Mako helps you do

Mako is where you:

1. Describe your brand once (Brand Brain)
2. Connect your social accounts
3. Write or generate posts
4. Schedule or publish them
5. See how they performed and reply to comments

It is **not** a website builder. You use it to run social and marketing content from one place.
