

Mako — Brand & Business Profile

Social Media Automation & Intelligent Co-pilot for SMEs

Company Name

Mako

Industry

Social Media Automation & Marketing SaaS (Software-as-a-Service)

Company Description

Mako is a next-generation marketing co-pilot and social media scheduler built specifically for small and medium-sized enterprises (SMEs). It enables business owners, startup founders, and social media managers to scale their digital presence by publishing to multiple platforms (LinkedIn, Facebook, Instagram, and X/Twitter) and managing their audience replies from a single dashboard.

Services & Features

- Multi-platform social media scheduling and calendar management.
- AI-powered content generation and auto-drafting.
- "Brand Brain" profile learning from websites, documents, or resumes.
- Automated replies and keyword-based trigger rule engines.
- Unified Social Inbox for managing Facebook comments, Instagram DMs, and LinkedIn replies in one place.
- Comprehensive marketing reports and post-performance analytics.

Target Audience

SME business owners, busy startup founders, marketing leads, and solo consultants who need to build a consistent online brand but lack the time, budget, or staff to hire a dedicated social media agency.

Audience Pain Points

- Posting consistently takes too much time and gets pushed down the priority list.
- Hard to write in a consistent, professional brand voice across different platforms.
- Loose or forgotten incoming messages when replying to customers on 3 or 4 different social networks.
- Traditional agencies are too expensive, and current scheduling tools are static and do not help with content creation.

Tone of Voice

Professional, warm, helpful, and direct. We write in plain English, avoiding complex marketing jargon, buzzwords, or exaggerated hype. We focus on real-world outcomes and actionable advice.

Brand Personality

The highly organized, detail-oriented colleague who always listens carefully, structures complex ideas with ease, and is optimistic about resolving business challenges.

Unique Selling Points (USPs)

1. The Brand Brain: Instead of generic AI output, Mako learns the company's services, target audience, and specific voice once, then creates bespoke, on-brand posts.
2. Unified Social Inbox: Reply to LinkedIn, Facebook, and Instagram comment threads and direct messages in a single dashboard.
3. Native WhatsApp Assistant: Easily configure auto-replies, menus, and greeting messages for customer inquiries on WhatsApp.

Current Offers & Promotions

- 14-day free trial on all plans (no credit card required).
- 20% discount on all annual Pro and Team subscription tiers.

Frequently Asked Questions (FAQs)

Q: Can I manage multiple social accounts?

A: Yes, you can connect multiple LinkedIn pages, Facebook pages, Instagram business accounts, and WhatsApp numbers, depending on your subscription plan.

Q: Does the AI sound robotic?

A: No. By feeding your brand documents into the Brand Brain, the AI learns your specific offerings and tone of voice so that generated posts sound like they were written by your team.

Q: Can I cancel my subscription anytime?

A: Absolutely. Mako runs on monthly and annual cycles with no contracts, meaning you can cancel, upgrade, or downgrade at any time.

Case Studies

- TechFlow, a software team, increased their LinkedIn inbound inquiries by 300% and booked 12 client demos in under 60 days after switching to Mako.
- GreenHarvest consolidated their customer response channels into Mako's Unified Inbox, cutting support response times by 50% and capturing more WhatsApp inquiries.

Banned Words & Buzzwords

synergy, leverage, paradigm shift, revolutionary, next-gen, cutting-edge, low-hanging fruit

Banned Topics & Guidelines

Do not write posts discussing political debates, non-business religious topics, competitor bashing, or sharing raw server/API credentials.
